The dashboard displays a list of campaigns with their names, total amounts raised, and progress bars. It also includes a "Your school's supporters" section and a "Supporter Insights" chart.

**Because fundraising should be powerful, not painful.**

Fundi was built on a simple belief: Australia's schools, clubs, churches, and charities deserve better. For decades, community fundraising has relied on outdated, time-consuming methods — chocolate drives, raffle books, sausage sizzles. These approaches burden volunteers, limit reach, and fail to engage the next generation of givers.

At Fundi, we believe everyone should be able to support their community effortlessly, and that the act of giving should feel personal, transparent, and rewarding. We exist to empower organisations to raise more, waste less time, and build lifelong member loyalty — all through technology that actually works for them.
